## PROJECTS

### Café API

A well-documented Café REST API which can be used to access information on a random or all cafes from a database, find a café by location, add a new café to the database, update coffee prices and delete closed cafes.

### Automated Data Entry job

An application that collects data that fits a particular criterion, computes the data and transfers needed information into a form to create spreadsheets for clients.

### Lola's RESTful Blog

A published fully-fledged blog website.

### Rain Alert app

An application that gets the weather information for the day and sends an email or text message notifying if it will rain.

### Stock news monitoring app

An application that compares daily closing stock prices, computes the differences, fetches some relevant news explaining the changes, and sends all the above by SMS.

### Cheap Flights finder app

An application that takes data, feeds into a flight search API, searches the destinations for the cheapest flight in a timeframe, and notifies by email or SMS.

### Automated bots

Namely:

- Automated Job applying bot
- Automated Tinder swiping bot
- Automated Internet speed Twitter complaint bot
- Automated Instagram followers bot
